Immunology and Cell Biology (1999) **77**, 572–575

Subject Index

Abstracts
  Annual Scientific Meeting of The Hong Kong Society for Immunology A19
  Annual Scientific Meeting of the Transplantation Society of Australia and New Zealand A1
acquired immune deficiency syndrome
  IL-12 control of murine cytomegalovirus in murine 131
  interactions of HIV-1 with APC (Review Article) 289
acute renal failure; involvement of Bcl-2 and growth factors 279
adjuvant; brushtail possum TNF-α 28
allergy; Th cell regulation by respiratory tract dendritic cells 428
alloantigen; murine FRP-1 19
antagonist; inhibition of naïve class-I restricted T cells 318
antigen; role of dendritic cells in presentation 404
antigen presentation; study using CFSE 539
antigen-presenting cell
  amnesia induction and MHC multimerization (Theoretical Article) 99
  interactions with HIV-1 (Review Article) 289
antigen response; in naïve lymphocytes 530
apoptosis
  activation induced as a mechanism of tolerance 216
  Bcl-2 and ischaemic acute renal failure 279
  effects of caspase gene disruption on 58
  elevated plasminogen receptor expression as a degradative phase effect in 249
  exposure of *N*-acetylglucosamine decreases early in dexamethasone-induced 224
  granule-bound pathways of 76, (Corrig.) 287
  granule-mediated and perforin-dependent targeting of granzymes 206
  induction by the Fas/Fas ligand pathway (Review Article) 312
  induction in depletion of $CD4^+$ T cells by HIV 90
  induction of by ionizing radiation 263
  in NK cells 64
  insulin-like growth factors in 256
  involvement of ribosomal proteins in 197
  rapamycin inhibits didemnin B-induced 242
  regulation by cellular zinc fluxes and zinc deprivation 272
  regulation of serine proteinases 47
  signalling by CD95 and TNF receptors 41
  viral modulation of the host response 236
arginine-glycine-aspartate peptide; antagonism with E-cadherin 337
assay; for recombinant and native IL-5 331
asthma; respiratory tract dendritic cells in Th cell differentiation 428
autoimmunity; role of dendritic cells in rheumatoid arthritis 420

β-catenin; dysregulation in Langerhans' cell histiocytosis 460
B7; costimulation in T-cell immunity (Review Article) 304
B cell; antibody formation, discovery of T cell help for 177
Bcl-2
  expression in renal cell carcinoma 11
  genes in the pathology of ischaemic acute renal failure 279
blastogenesis; assays for T-cell function 559
blocking antibody; effectiveness of rat IgG subclasses as IgE 121
Book reviews 105, 194, 373, 468, 565
Borna disease virus; infection and dendritic cell function 153
Burnet; Sir Frank Macfarlane (Burnet Oration) 167

calmodulin; effects on regulation of RAS and mitogen-activated protein kinases 356
cancer; dendritic cell immunotherapy for 451
carboxyfluorescein diacetate succinimidyl ester
  analysis of growth kinetics 523
  assays for T-cell function 559
  for quantitative *in vitro* analysis 516
  for study of antigen presentation 539
  for tracking cell proliferation 509
  labelling of naïve lymphocytes 530
  lymphocyte migration studies 499
  monitoring human NK cell division 544
  study of tumour antigen cross-presentation 552
carcinoma; cholera toxin-induced alteration of ovarian 377
caspase
  action in ionizing radiation-induced apoptosis 263
  disruption of genes in mice 58
  inhibition and viral modulation of the host response 236
  regulation of activation by cellular zinc fluxes 272
cathepsin G; regulation of pro-apoptotic functions of 47
CD95; signalling in apoptosis 41
CD98; monoclonal antibodies against 19
cell adhesion; antagonism between E-cadherin and RGD tripeptide 337
cell division; tracking using CFSE 523, 530
cell growth; regulation of by ribosomal proteins 197
cell signalling; dysregulation of the E-cadherin–β-catenin cascade 460
CFSE *see* carboxyfluorescein diacetate succinimidyl ester
chemokine
  in infectious diseases (Review Article) 469
  production and dendritic cells 404
cholera toxin; alteration of carcinoma cell line phenotype 377
cisplatin; expression of RAS in macrophages treated with 356
collagen, type II; phagotopes derived using an antibody to 483
complementarity determining region; length in TCR α and β chain 391
cornea; TNF-α production in response to *Pseudomonas aeruginosa* challenge (Brief Communication) 164

costimulation
by B7 in T-cell immunity (Review Article) 304
visualization of lymphocyte recognition 186
cross-presentation; of tumour antigens 552
CTLA-4; in regulation of immune responses (Review Article) 1
cycloheximide; induction of apoptosis and increased plasminogen 249
cytokine
delivery using recombinant viruses 324
gene expression in liver 139
in infectious diseases (Review Article) 469
cytomegalovirus; role of IL-12 in control of murine 131
cytotoxic T lymphocyte
anti-viral strategies of 76, (Corrig.) 287
in tumour immunotherapy 180
cytotoxicity; antibody-dependent cellular 127

deciduomata; cytotoxicity in pseudopregnant rats with 127
dendritic cell
development 411
functions in immortalized cell lines lacking type I and II IFN receptors 153
HIV-1 infection in monocyte-derived 442
immunotherapy for cancer 451
in long-term stroma-dependent cultures 434
maturation and function 404
regulation of Th cell differentiation by 428
role in autoimmunity in rheumatoid arthritis 420
didemnin B; rapamycin inhibits apoptosis induced by 242
DNA damage; cell death induced by the Fas/Fas ligand pathway (Review Article) 312
dye dilution; tracking cell proliferation using 509

E-cadherin
antagonism with RGD tripeptide 337
dysregulation in Langerhans' cell histiocytosis 460
epithelial growth factor receptor; expression altered by cholera toxin 377

Fas
and NK cells in apoptosis 64
expression in renal cell carcinoma 11
pathway and induction of cell death (Review Article) 312
flow cytometry; for analysis of lymphocyte proliferation 516
foetal thymic organ culture; interleukin-1 receptor expression in 491
FRP-1; expression in mice 19

glucan; priming of macrophage function by 395
granule exocytosis; in apoptosis 76, (Corrig.) 287
granzyme; perforin-dependent nuclear targeting of 206
granzyme B; regulation of by granule serine proteinases 47
growth kinetics; analysis by division tracking 523

Hoechst 33342; lymphocyte migration and proliferation studies 499
human immunodeficiency virus
induction of apoptosis to deplete CD4+ T cells 90
infection and chemokines (Review Article) 469
interactions with APC (Review Article) 289
monocyte-derived dendritic cells in study of HIV-1 442
humoral immunity; role of B7 costimulation (Review Article) 304

IGF *see* insulin-like growth factor
immune
regulation, role of CTLA-4 in (Review Article) 1
response, modulation by bovine whey protein 345
tolerance, apoptosis of T lymphocytes as a major mechanism of 216
immunoglobulin A; salivary subclasses and infection risk 351
immunoglobulin G; rat subclasses as IgE-blocking antibodies 121
immunomodulation; effects on macrophage activation of (1,3)-β-D-glucan 395
immunostimulation; culture of dendritic cells 434
immunotherapy
for cancer with dendritic cells 451
tumour 180
use of recombinant viruses to deliver cytokines 324
inflammatory cytokine; in patients with septic shock 34
insulin-like growth factor; and programmed cell death 256
interferon receptor; knockout cell lines and dendritic cells 153
interleukin-1 receptor; expression in culture 491
interleukin-4; can replace preproenkephalin for Th2 differentiation 385
interleukin-5; bioassay for detection of ovine 331
interleukin-6; gene expression in liver 139
interleukin-12; role of in control of murine cytomegalovirus 131
ionizing radiation; induction of apoptosis 263
ischaemia; involvement of Bcl-2 and growth factors 279

John Curtin School of Medical Research; scientific lineages of the (Burnet Oration) 167

Langerhans' cell histiocytosis; caused by E-cadherin–β-catenin cascade dysregulation 460
lipopolysaccharide; structure and production of nitric oxide and TNF-α 143
Listeria monocytogenes; challenge after cytokine expression 324
liver; cytokine gene expression in 139
long-term culture; source of dendritic cells 434
lymph node formation; osteoprotegerin ligand and 188
lymphocyte
development and osteoprotegerin ligand 188
differentiation, quantitative analysis using CFSE 516
division, tracking with CFSE 509
migration, using fluorescent dyes to study 499
lymphoid; derivation of dendritic cells 411
lymphoid tissue; mucosa-associated (Theoretical Article) 364
lymphoma; dendritic cell immunotherapy for low-grade 451

M290 integrin; functional mouse homologue of HML-1 337

macrophage
activation by (1,3)-β-D-glucan 395
expression of RAS and mitogen-activated protein kinases 356
interactions of HIV-1 with APC (Review Article) 289
major histocompatibility complex
and T cell help for B cell antibody formation 177
effects of class I receptors on natural killer cell division 544
multimerization and induction of APC amnesia (Theoretical Article) 99
mast cell; function in the rat basophil leukemia cell model 121
mastoparan M; stimulation of TNF-α and IL-1β release 476
memory cell; role of B7 costimulation in T-cell immunity (Review Article) 304
mice, transgenic; in study of antigen presentation 539
microscopy; visualizing lymphocyte recognition through video 186
milk; modulation of immune function by bovine whey protein concentrate 345
mitochondria; caspases and apoptosis pathways in 58
monocyte; dendritic cells derived from in study of HIV-1 442
mucosa-associated lymphoid tissue (Theoretical Article) 364
mycobacteria; and mucosa-associated lymphoid tissue (Theoretical Article) 364
myeloid; derivation of dendritic cells 411
myeloma; dendritic cell immunotherapy for multiple 451

natural killer cell
and apoptosis 64
control of murine cytomegalovirus in murine AIDS 131
effects of class I MHC receptors on division 544
nitric oxide; suppressive effects of serum on LPS-induced production of 143
nitrite; release stimulated by mastoparan M 476
Nobel prize; influence of John Curtin School of Medical Research on laureates (Burnet Oration) 167
nuclear protein import; of granzymes and apoptosis 206

osteoclastogenesis; osteoprotegerin ligand in lymphocyte development and 188
ovalbumin; inhibition of T cells by altered 318

p53
apoptosis and insulin-like growth factors 256
ionizing radiation-induced apoptosis 263
peptide library; antibody screening for phagotopes 483
perforin
and NK cells in apoptosis 64
nuclear targeting of granzymes 206
phage display; phagotopes found by antibody screening 483
plasminogen; elevated receptor expression in cellular apoptosis 249
pokeweed mitogen; use in flow cytometry to detect *N*-acetylglucosamine exposure 224
possum; physiological effects of TNF-α from 28
preproenkephalin; not required for *in vitro* Th2 differentiation 385
Pseudomonas aeruginosa challenge; and TNF-α production (Brief Communication) 164
pseudopregnancy; and cytotoxicity in rats with deciduomata 127

random assortment; of length of complementarity determining regions on TCR 391
rapamycin; inhibition of didemnin B-induced apoptosis 242
RAS; expression in cisplatin-treated macrophages 356
renal cell carcinoma; and expression of apoptotic regulatory molecules 11
respiratory infection; risk in elite swimmers 351
reverse transcriptase polymerase chain reaction; analysis of cytokine gene expression in liver 139
rheumatoid arthritis; role of dendritic cells in autoimmunity 420
ribosomal protein; involvement in regulating apoptosis 197
RT-PCR *see* reverse transcriptase polymerase chain reaction

saliva; IgA subclasses in and infection risk 351
septic shock; bile or intestinal fluid analysis from patients 34
serine proteinase; regulation by intracellular serpins 47
serpin; expression in viral modulation of the host response 236
serum; suppressive effects of on LPS-induced production of nitric oxide and TNF-α 143
severe combined immunodeficient mice; xenografts of human synovium in 109
sheep; bioassay for IL-5 331
signal transduction; activation by TNF family receptors 41
stroma; dependent cultures are a source of dendritic cells 434
suppression; by bovine whey protein of immune function 345
survival factors; insulin-like growth factors and apoptosis 256
swimmer; infection risk in 351
synovium; human xenografts of in SCID mice 109

T cell
activation and MHC multimerization (Theoretical Article) 99
apoptosis of autoreactive and alloreactive in the target organ 216
assay for function using CFSE 559
biology of plasmacytoid 411
depletion by HIV 90
help for B cell antibody formation 177
inhibition of naïve class-I restricted 318
regulation and CTLA-4 (Review Article) 1
visualizing recognition 186
T cell receptor for antigen; α and β chain complementarity determining region 3 391
T helper cell; regulation of differentiation by dendritic cells 428
T helper cell 2; preproenkephalin not required for differentiation *in vitro* 385
thymocyte; interleukin-1 receptor expression in 491

translation; involvement of ribosomal proteins in cell growth, apoptosis and 197
transplantation; human synovium xenografts in ears of SCID mice 109
tuberculosis; and mucosa-associated lymphoid tissue (Theoretical Article) 364
tumour
  cross-presentation of antigens 552
  immunotherapy 180
tumour necrosis factor; role of receptors in apoptosis and activation 41
tumour necrosis factor-α
  in patients with septic shock 34
  production in response to *Pseudomonas aeruginosa* challenge (Brief Communication) 164
  recombinant brushtail possum 28
  release stimulated by mastoparan M 476
  suppressive effects of serum on LPS-induced production of 143

virus; recombinant, for cytokine delivery 324

Walter and Eliza Hall Institute; Burnet lineage and (Burnet Oration) 167
wheat germ agglutinin; in flow cytometry to detect *N*-acetylglucosamine exposure 224
whey; protein concentrate modulates immune function 345

zinc; effects on regulation of caspase activation and apoptosis 272
